

## **Dialog Boxes: alert, prompt, confirm**

### **1. Alert Box:**

- Used to display a message to the user.
- It only has an OK button.
- It is often used to show information or warnings.

### **2. Prompt Box:**

- Used to take input from the user.
- It has a text box + OK and Cancel buttons.
- If the user presses OK, it returns the input value.
- If the user presses Cancel, it returns null.

### **3. Confirm Box:**

- Used to ask a Yes/No (true/false) question from the user.
- It has OK (returns true) and Cancel (returns false).
