

Practise Set(JS Ki Teen Teer! 🎯)

Q1. Create an array of your 3 favorite fruits.

→ Add one more fruit at the end using `push()`.

→ Remove the first fruit using `shift()`.

→ Print the final array.

Q2. You have this array:

```
let numbers = [10, 20, 30, 40, 50];
```

→ Use a **for loop** to print each number.

→ Then use **forEach** to do the same.

Q3. You have this array:

```
let marks = [45, 67, 32, 89, 76];
```

→ Use **map()** to create a new array where each mark is increased by 5.

→ Print the new array.
