

Practise Set(JS Ki Teen Teer!)

Q1 .What does the following code print?

```
let today = new Date("2025-08-21");  
console.log(today.getMonth());
```

Options:

- A) 8
- B) 7
- C) 21
- D) 0

Q2 .Write code that:

- Prints "Start" immediately.
- After **2 seconds**, prints "Hello after 2 sec".
- Uses setInterval to print "Tick" every **1 second**.
- Stops the interval after **5 seconds**.

Q3 .

You are given an array of numbers:

```
let nums = [5, 10, 15, 20];
```

→Use the **spread operator** to pass all elements of nums into a function.

→The function should use the **rest operator** to collect the numbers, then calculate their sum.

→Instead of returning the sum directly, use a **callback function** to display it.
